

Configura is looking for a Software Quality Assurance Analyst

WHO WE ARE

You may not recognize a Configuran in the street – we come in all shapes, forms and personalities and we certainly wouldn't dream of instituting a company dress code – but with five offices on three continents, we're one Configura. International relations, challenging tasks where we expect you to solve the assignments in a new and innovative way, as well as a close-knit group of people that enjoy having fun together – these are just some of the things we can offer you.

Configura works with parametric configuration. We develop software to draw spaces in 2D and 3D for leading companies within commercial furniture, kitchen and bath, material handling, industry and laboratory. In the background, prices and configurations are automatically calculated. We are a global company with customers in 10 countries and users in more than 50. We are headquartered in Linköping, Sweden, with two wholly owned subsidiaries in Grand Rapids, Mich., USA, and Kuala Lumpur, Malaysia. Our office in Shenzhen, China will be opening soon as well.

WHO WE BELIEVE YOU ARE

At the lunch table, by the drinking fountain, after a catnap or during a game of table tennis. We don't know when or where you get your best ideas, but we believe that you have them and they're always welcome at Configura. We think you're a communicative and systematical problem-solver at the beginning of your career. You have a strong team focus and are enthusiastic about collaborating with our development teams to achieve top quality for our software and processes.

SKILLS & REQUIREMENTS

Responsibilities:

- Quality assurance of graphical design system modules (CET Designer) by manual testing and usage of various tools, and deliver reports detailing the results of test activities.
- Develop test plans based upon software requirements.
- Work with development team to analyze and resolve defects.
- Collaborate with teams from Europe and North America.
- Contribute towards continuous improvement of the software and processes.

Requirements:

- Excellent problem analysis, troubleshooting, and resolution skills.
- Meticulous, systematic and well organized individual.
- Strong team focus, flexible and able to multi-task.
- Excellent written and verbal English communication skills.

Beneficial but not required:

- Experience in agile development process such as Scrum or Kanban.
- Interest in user interface/user experience.
- Interest in providing user support.
- Knowledge of computer systems and software (e.g. troubleshooting graphic drivers and operating systems related issues).
- Can work together with our IT team in Sweden on networking issues etc.

Education:

Candidate must possess at least a Diploma, Advanced/Higher/Graduate Diploma, Bachelor's Degree of Computer Science/Information Technology, Engineering or equivalent.

HOW TO APPLY
