

## 7.5.20 Catalogue Creator Release Notes

### Updates and Fixes in Catalogue Creator 7.5.20

---

#### New features of Catalogue Creator

- **New Uploader !**

Whilst it looked the same, we have change how things work for uploader. It will now upload directly to **Amazon CloudFront** and then synchronize to **MyConfigura**. This has significantly reduced the uploading time.

Load a project file via drop down and then click on **compare server/local timestamps** button to check for local /server file availability.

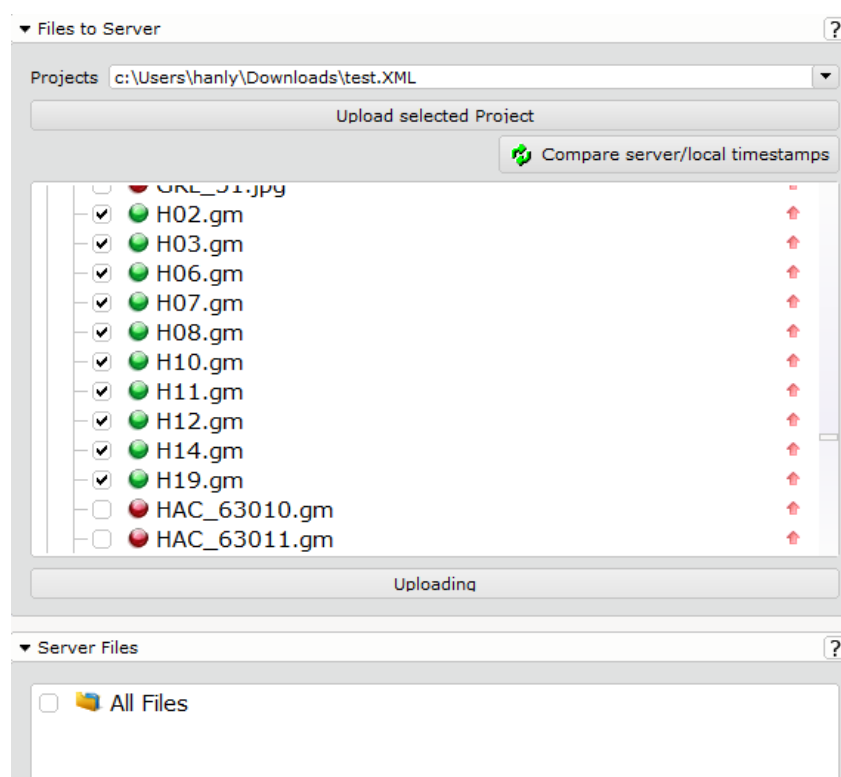

Image 1 : Uploading data to a portfolio, the progress bar updated its status to "Uploading".

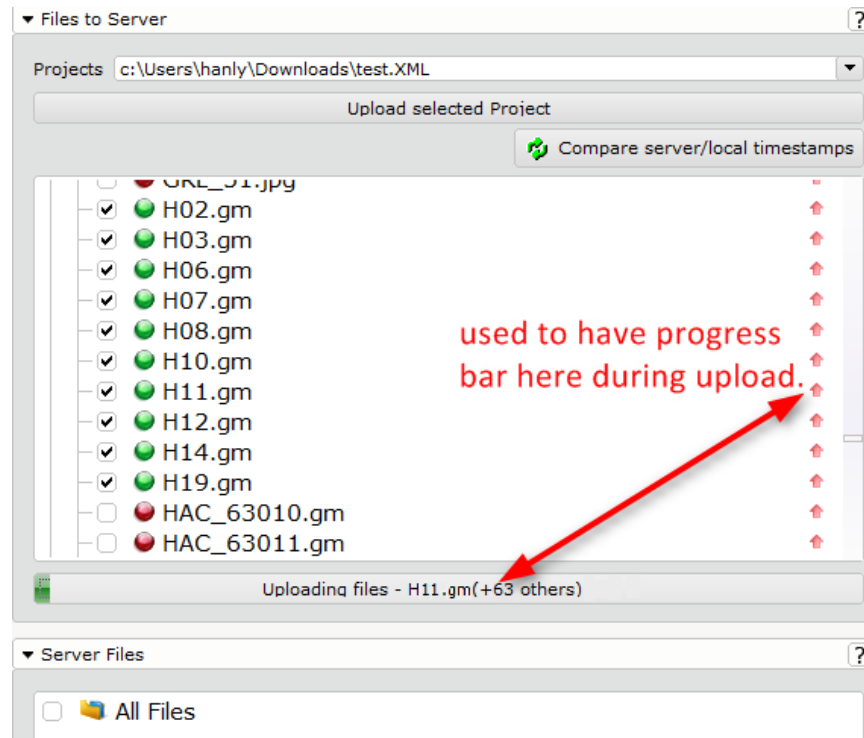

Image 2 : The progress bar per file will be replaced by the status shown in the progress bar

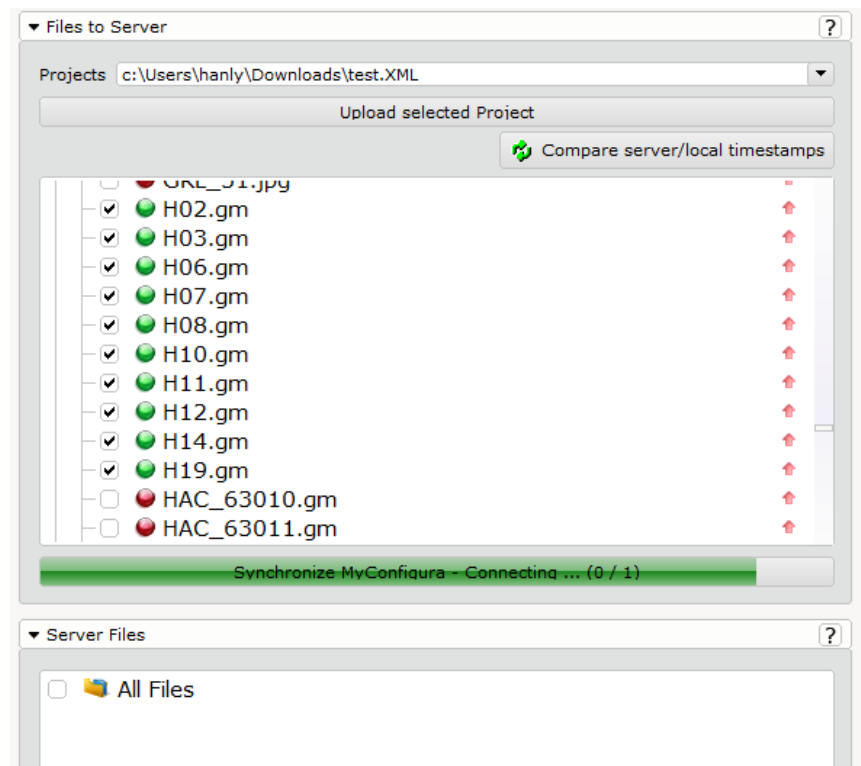

Image 3 : Uploader will automatically synchronize to **MyConfigura** at the end of the upload.

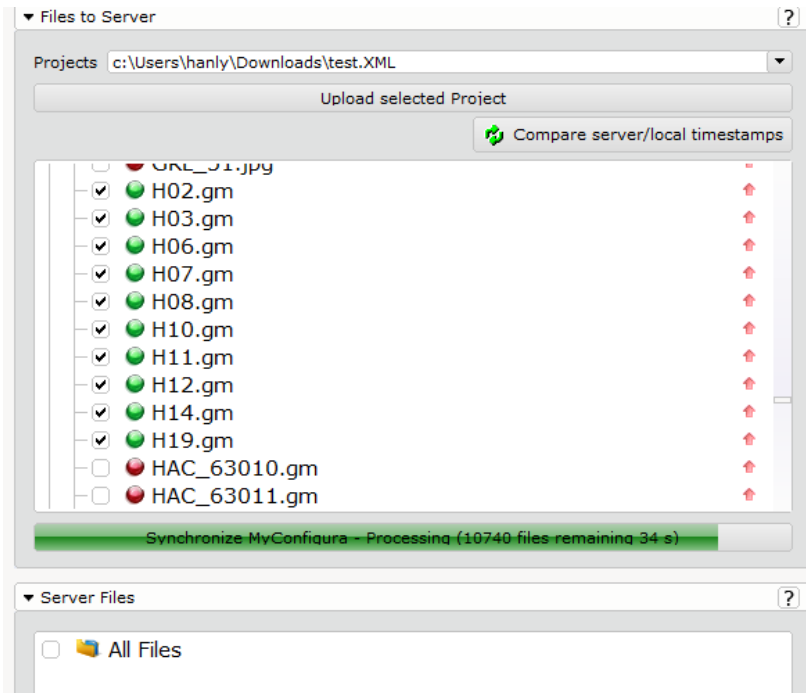

Image 4 : Showing the breakdown of synchronize items.

Image 6 : All uploaded files in the server will be shown here.

- **New UI for deleting files**

New progress bar with status shown.

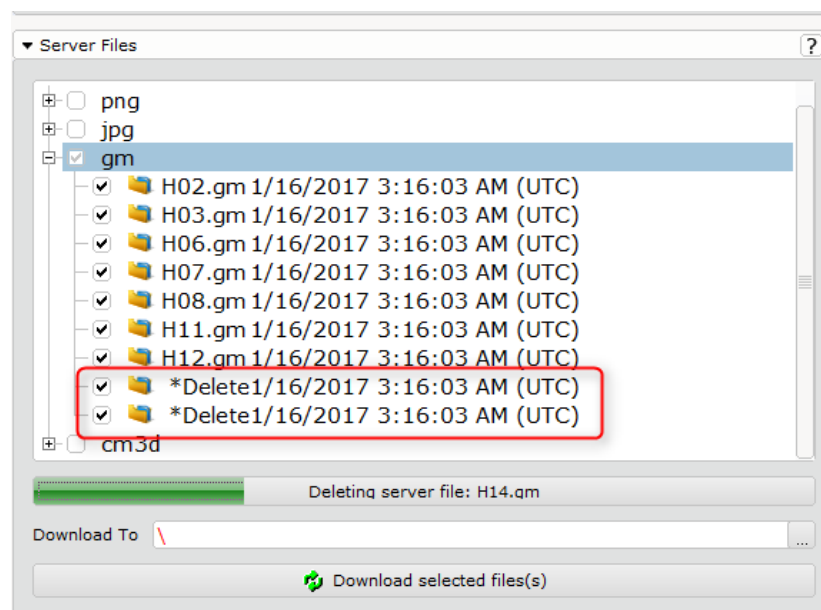

Image 7 : File deleting status is shown in the progress bar as well.
