

# Catalogue Tools 9.0 Patch 2 • Release Notes

16<sup>th</sup> July 2018

## New Features

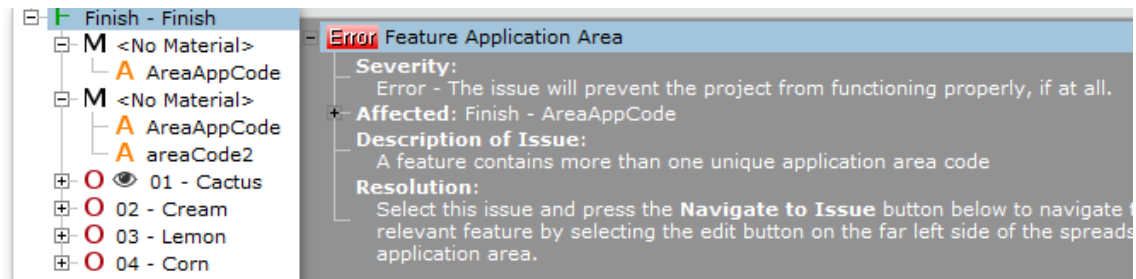

Added a default preference button in Catalogue Creator control panel

- Save a copy of default preference when click.
- When loading a project, catalogue creator will look for the project preference (same name as the project's file name) first and then the default catalogue preference file in the defined preferences directory.
- Project loaded without a project catalogue or default catalogue preference will have all its visibility setting fully turn on.

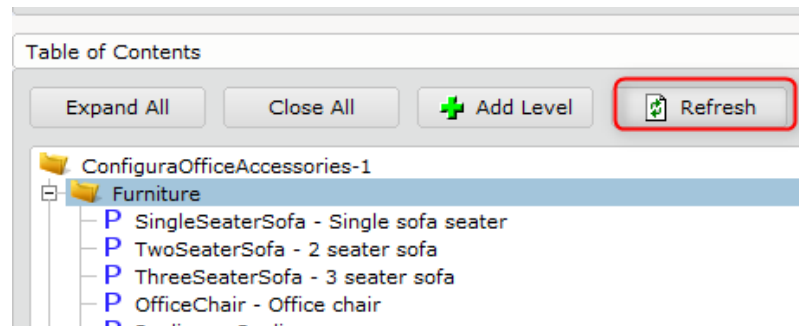

Added Feature Application Areas validation

- Detects duplicated application area code in a single feature tree level.

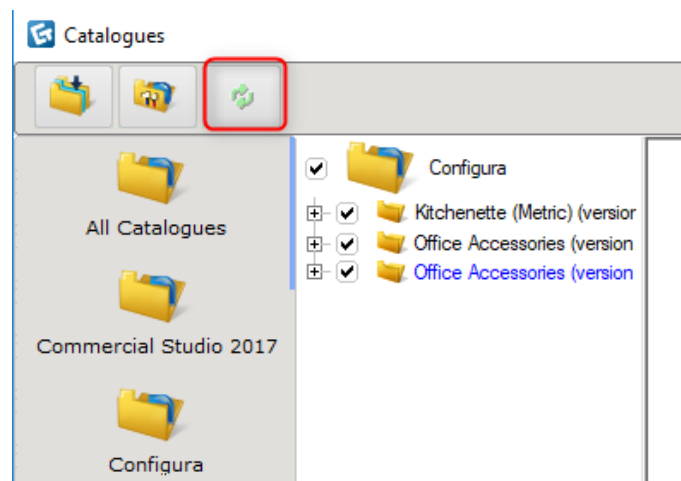

Added a Refresh button in Product Catalogues card

- The Refresh button refreshes the currently selected items (products and product level folders) by matching the product description in **Products** card.
- It will replace the previous sync button that updates a single selected product.
- Button will only enable when a selection is made.
- Update recursively: If a product level folder is in the selection all its products and subfolder-products will be refreshed.
- Use Ctrl-A to select all products then refresh to update their descriptions.

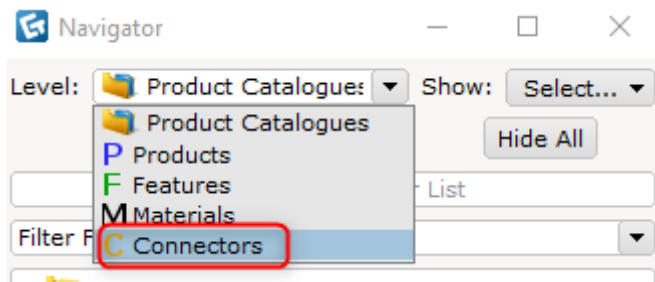

Added a refresh button in Catalogue Explorer Dialog

- The refresh button rebuilds the explorer dialog.
- Button is disabled by default and will be enabled once more data are available.

Added connector filter to Navigator

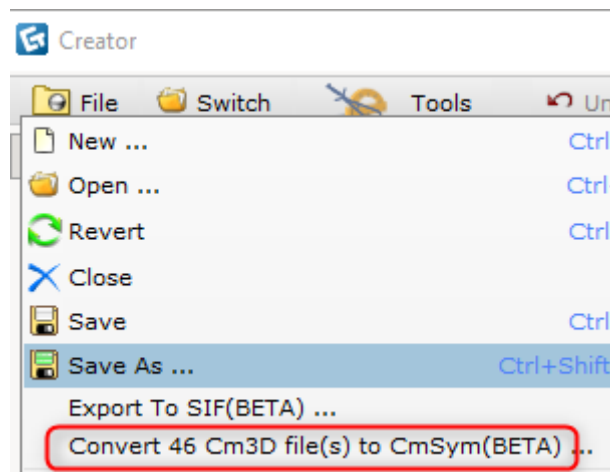

## Bug Fixes

Fixed setting default option when style number has changed

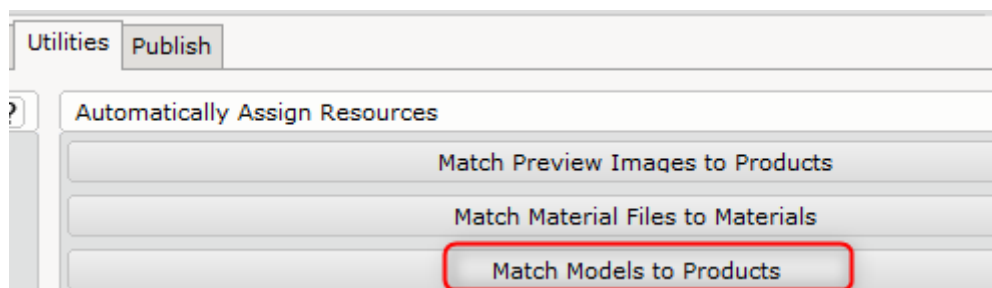

Fixed copy and pasting from excel to Catalogue Creator's spreadsheet

Fixed missing Level of Details when converting from cm3D to cmSym using Catalogue Creator

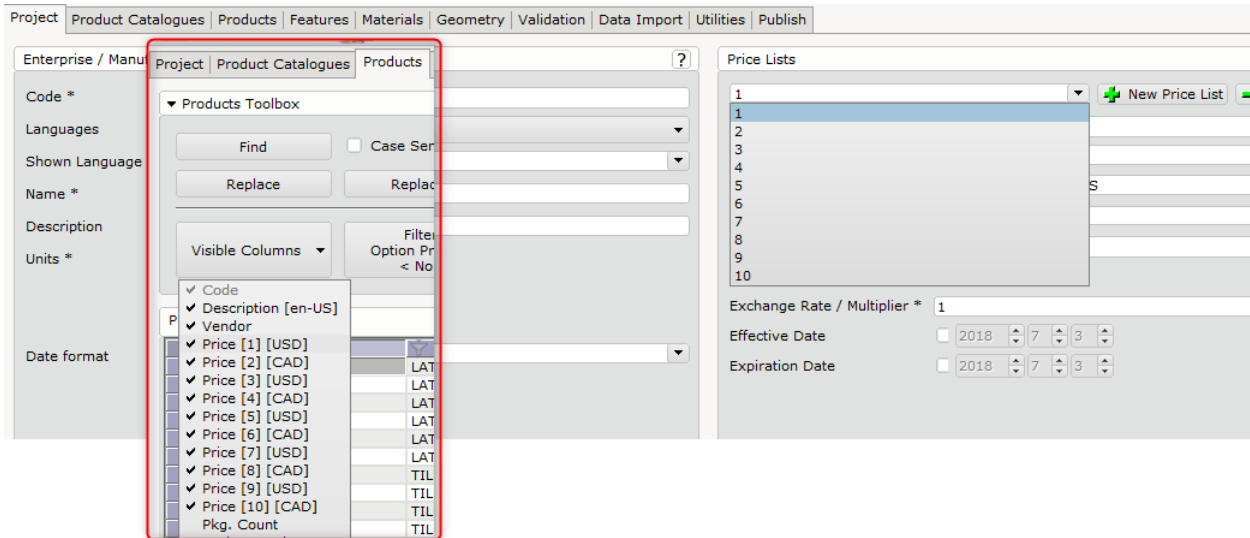

- CmSym will now have the same LODs as cm3D.

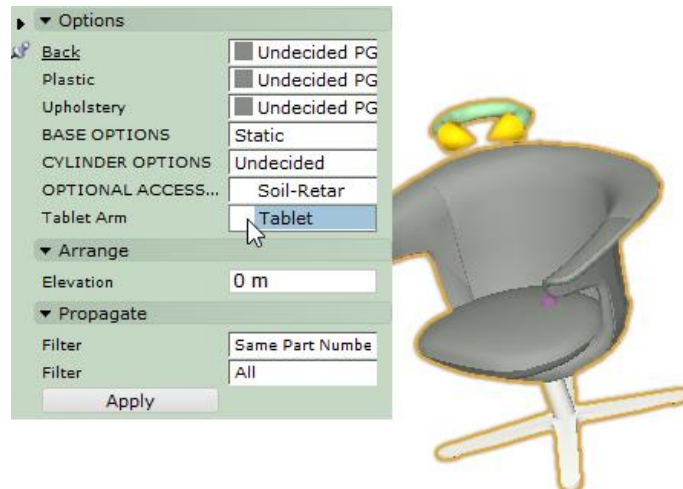

Fixed match models to products for cm3D

Fixed sorting pricelist order in Projects and Products cards from smallest to largest number

Fixed feature not going back to base number

## Crash Fixes

- Fixed crash when deleting portfolio.
- Fixed crash when searching for a model number in the Geometry card.
- Fixed crash when clicking on catalogue explorer button.

- Fixed crash when opening project file to look for a non-existing product with dsPData Debug dialog.
- Fixed crash when editing custom resolution.
- Fixed crash when opening catalogue creator.
- Fixed crash when exporting data symbol as DWG.
- Fixed crash when download task starts before downloader is ready.
- Fixed crash when trying to save project with empty resource directories.
- Fixed crash when changing option of connected data symbols.
- Fixed crash when filter on feature code and press enter.
- Fixed crash when validating material texture resolution.
- Fixed crash when uploading a catalogue from the home folder.
