

Catalogue Tools 9.0 Hotfix 1 • Release Notes

5th June 2018

Bug Fixes

Fixed Category column under Products tab, where categories selected didn't get reflected properly in the column

- Sub-categories will be shown accordingly in the Visibility Settings.

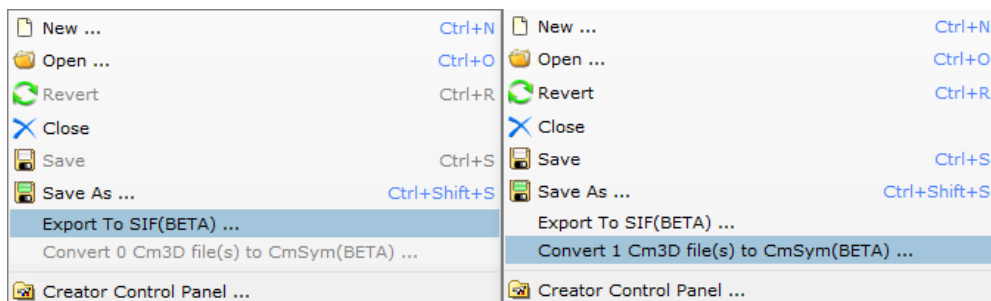

Fixed image after update

- Ensure image cell will always be displayed.

	Part Number	Description
	WS-A	120° Worksurface
	WS-C	Corner Worksurface
	WS-L	L-Shape Worksurface
	WS-R	Rounded Worksurface
	WS-S	Straight Worksurface

Always show cmSym menu option, disable if not valid

- Previously, the menu "Convert cm3D to cmSym" will be removed when there is no project loaded or when cm3D is not used as the model format. Now we show the menu at all time by enabling/disabling it.

Fixed cmSym bound

Fixed cmSym connector positions

Fixed a bug where categories opened in Catalogue Creator are not registered

Improved download speed for large files

Improved performance of some symbols which were slow to load in CET view

Fixed a bug where connectors didn't update, and disappeared when product option has been changed

Fixed a bug where symbol doesn't get highlighted after selecting Show Symbol in Catalogue

Enabled select layer of a model from 3D view function, under Geometry - Layers tab

2D CmSym now shows in color

Fixed Geometry Lite, which allows 2D CmSym model to show up
