Configura 9.9.1 • Release Notes

June 21, 2021

News and changes

Configura Core version 9.9.1 is a minor version update as presented below.

Miscellaneous

- The Catalogue Server, Graphics Engine and Render Server have all been upgraded to the latest version (12.0).

Bug fixes

- Fixed issue with selecting an image file in the Material/Color change dialog that could cause a crash.
- Fixed issue with saving to PDF that could cause a crash if a print frame contained more than one camera view with the **Include 3D view in PDF files** option enabled.
- Fixed problem with dwg import that could cause lines to not be included in the imported drawing.
- Fixed problem that could cause the Catalogue Server installation to hang when updating through LiveUpdate. (Only for users who run LiveUpdate)
